## PROJECTS

### YouTube Video Search

#### [Academic Project]

Developed a website consisting of search bar where user can type video name and playlist will appear and user can select related video to play.

**Technology Used:** React js/HTML/CSS/JavaScript/Youtube API

### Weather App

#### [Academic Project]

Developed a weather app, where user can search weather for particular city by typing city name in search box.

**Technology Used:** React js/HTML/CSS/JavaScript

### My Buy Catalogue Update - RPA

#### [Professional, Client]

Automation project to upload product catalog data from suppliers onto SAP Ariba portal. Suppliers send their catalog information (.xls/.xlsx/.zip) to a SPA mailbox. Bot must validate data based on predefined rules and has to either create/refresh catalog on SAP Ariba portal.

**Technology Used:** UIPATH /Outlook/ MS Excel / SAP Ariba
